PROJECTS & TECHNICAL EXPERIENCE

Goal/Task Tracker — [GitHub](#)

Full-stack productivity app built with **Django**, **React**, and **PostgreSQL** to manage goals and daily tasks.

- Implemented recurring task logic, user authentication, and secure session handling.
- Designed a responsive 7-day calendar view with inline task creation and clean UI/UX.

Mizzou Marketplace (Capstone Project)

Team-built student marketplace using **Django**, **React**, and **SQLite**.

- Developed product listing, search, and authentication features.
- Enabled secure peer-to-peer buying/selling among university students.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C#, HTML/CSS, SQL

Frameworks: ReactJS, Django, Node.js, Angular

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, Docker, Jira

OS: Mac OS X, Windows, Linux
